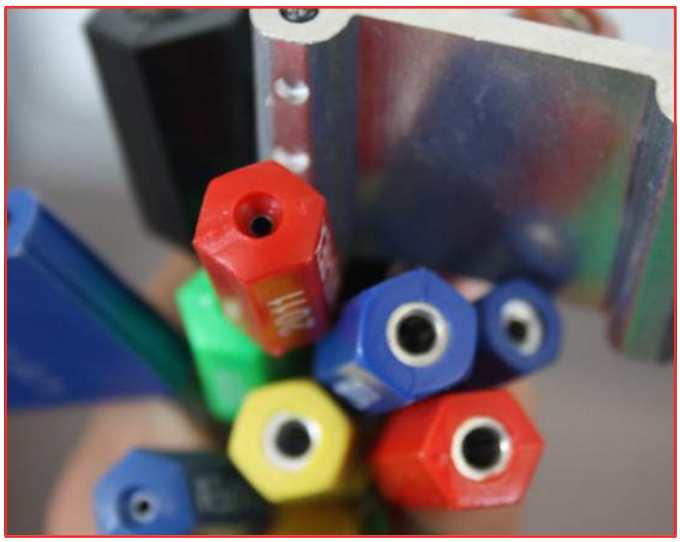
With proud LIFT-TEX® presents the self developed inspection tag program, specific for lifting equipment like polyester webbing and round slings, chains, steel cables and other lifting equipments which are subject annually to testing and inspection.
What you probably already know from own experience is that all lifting equipment need their inspection "under the hook" periodically. If you're a member of a trade association as DNV, EKH, Lloyd, TÜV-Nord or Aboma Keboma you probably follow the annual color code each year (2010:brown, 2011:blue, 2012:yellow, etc).



Experiences from the field show that this color coding often with a spray or a brush with paint is applied. It takes lots of time to check if the products are recently approved , especially if these products hang at a height.

Often, they work with stickers or metal rings that will be attached on the steel cable, on which the inspection date or certificate number is displayed. This activity's are time consuming for the judges/inspectors and will lead to higher costs.

LIFT-TEX® Industrie b.v. has developed the inspection tag which will solve the time consuming problem. The features of this new inspection tag are:

- Flexible and in every size available
- Low-priced (because of the modern and efficient coating procedé and high-tec pressure facility's)
- Efficient (It will attached easy and fast. No tools needed)
- Time saving (high efficiency)
- Certainty (if the tag is closed the only way to open it is to cut it loose)
- In every color available (contact us for more information)
- No damage (won't cause damage to the lifting equipment)
- Unique code (serial numbers possible)
- Exposure/awareness (available with custom print for example the company name)

* The inspection tags from own stock are available in the standard size with a total length of 22,5 cm (steel cable length of 18,5 cm). Other sizes are available on request. Several (stainless) steel cable thicknesses are also available on request.

The versions with current year color are basically always available from stock. Versions with different sizes/colors, special serial numbers or with custom print are available on request.

Color	Year	Year	RAL-color
Brown	2010	2016	8002
Blue	2011	2017	5017
Yellow	2012	2018	1023
Red	2013	2019	3020
Black	2014	2020	8022
Green	2015	2021	6018
