

Next generation: **EXTREEMA® XS** high performance round slings

Get to know

EXTREEMA® HMPE XS round slings

The extra thin WLL 3T, WLL 5T & WLL 10T Extrema® round slings make it possible to lift heavy payloads when you have to work with limited spaces.

With an extremely small diameter and a D:d ratio of 1:1, it also enables you to work with regular classic model bow shackles instead of more expensive wide body shackles and lift on the pin. The slings are available in various colours and very short effective working lengths (0,3m-20m). Moreover, it is possible to equip the sling with different kinds of protections.

Features

- ✓ D:d ratio of 1:1
- ✓ Access to limited lifting space
- ✓ Flexible and light in weight
- ✓ Less storage needed
- ✓ Improving workflow
- ✓ Saving costs
- ✓ Long life cycle
- ✓ Environmental friendly
- ✓ Safer lifting operations

One size fits all

By making use of the WLL 3T (6T basket), WLL 5T (10T basket) and WLL 10T (20T basket) Extrema® slings, you can discard all polyester slings from 1T up to 20T. This saves you costs in storage, logistics, purchasing and disposal, while supplying your employees with a more efficient and faster workflow.

Sustainability

Additionally, you contribute to the environmental reduction of pollution as a result of the long life span of Extrema® slings and tremendous reduction of industrial waste.
