

Inspection Tags: for periodic inspection of lifting equipment

With proud LIFT-TEX® presents the self-developed inspection tag program

These inspection tags are specifically designed for lifting equipment like: webbing and round slings, chains, steel cables and other lifting equipment, which is subject to testing and inspection annually.

Experiences from the field show that color coding is often applied with a spray or a brush with paint. It is difficult and takes a lot of time to check if the products are recently approved, especially if these products hang at a height.

The solution!

LIFT-TEX® Industrie B.V. has developed **the inspection tag**, which solves this problem for years already in different industries.

Features

- ✓ Flexible and in every size available
- ✓ Efficient: it can be attached easy and fast, no tools needed.
- ✓ Time saving: high efficiency
- ✓ Secure: when the tag is closed, the only way to open it, is to cut it loose.
- ✓ In every color available (contact us for more information)
- ✓ No damage: it won't cause any damage to the lifting equipment.
- ✓ Unique code (serial numbers possible)
- ✓ Exposure/awareness: available with custom print for example the company name.
