

## Lifting belt sling

### Be safe with the strongest lifting belt slings!

With the new generation of lifting belt slings from Lift-Tex®, you can lift loads up to 100T with HMPE and 50T with polyester safe, according to EN norms 1492- 1/2 with a safety factor of 7:1!

This truly outstanding development is based on an advanced manufacturing technology with a modern construction, allowing a larger lifting area of the belt with shortened soft eyes.

### Features

- ✓ Strong core
- ✓ High abrasion and cut resistant protection sleeve
- ✓ Double the service life of normal lifting slings
- ✓ Longer life span when lifting materials with sharp edges such as steel- and aluminium coils, steel pipes, steel bars and plates

### Lifting belt slings and lifting mat slings

The Lift-Tex® lifting belt sling is available in width from 30mm to 300mm and the lifting mat sling for pipelines in width up to 900mm. The two soft, reinforced eyes on each end make it easy for crane hook handling. In addition, special abrasion resistant cut protection sleeves are available in every the required length.
