

**LIFTING BELT
SLING**

Lift-Tex® introduces the latest generation of lifting belt slings, enabling you to lift loads of up to 100T with HMPE and polyester. These slings comply with EN norms 1492-1/2 and boast a safety factor of 7:1.

Durable and easy to use

But that's not all. The Lift-Tex® lifting belt sling is as versatile as it is advanced. Available in widths up to 600mm, it caters to a wide range of lifting requirements. Each sling has two soft, reinforced eyes on each end, making hook handling a breeze. No more struggling with awkward connections or risking damage to your equipment—our slings are designed with ease of use and durability in mind.

Protection

We offer specialized abrasion-resistant cut protection sleeves for added protection against wear and tear. Available in custom lengths, these sleeves provide an extra layer of defense, ensuring your lifting operations remain smooth and trouble-free.

Features

- ✓ Strong core
- ✓ High abrasion
- ✓ Cut resistant
- ✓ Double the service life of normal slings
- ✓ Longer life span
- ✓ Safer lifting operations

Be safe with the strongest lifting belt slings

This product isn't just about numbers, precision engineering, and innovative design. Combining cutting-edge multi-channel manufacturing techniques and modern design principles, we've made lifting belt slings with a larger lifting area while featuring shortened soft eyes. These features mean increased stability and control, ensuring your lifts are safer and more efficient than ever.
